BENEFITS: SHARING RESEARCH DATA

**BENEFITS FOR INDIVIDUAL RESEARCHERS**
- More citations
- Improved recognition
- Greater discoverability
- Reduces inefficiencies
- Increases visibility
- Increases validity
- Increases usage
- Longevity of research
- Improves credibility
- Advances reproducibility
- New collaboration opportunities
- Improves output connections

**BENEFITS FOR RESEARCH COMMUNITIES**
- Benefits teaching
- Improves future research
- Enables replication
- Improves long-term archiving
- Increases collaboration
- Increases trust in research
- Advances reproducibility
- Increases resources
- Advances understanding of research

**BENEFITS FOR SOCIETY**
- Enables public understanding
- Economic benefits
- Easier access to research
- Improves links with industry
- Increases recognition
- Promotes citizen science
- Informs policy
- Greater understanding of research
- Innovation increases
- Advancement of research
- Longevity of research
- Improves credibility
- Improves future research
- Reduces unnecessary experimentation
- Increases usage
- Increases validity
- Increases resources
