

Springer Research journals

PRINT SPECIFICATIONS

Requirements for display and classified advertising, inserts and outserts

ADVANCING
DISCOVERY

Contents

This document contains the specifications for display advertising, classified advertising, and inserts/outserts for selected Springer Research journals, which are printed across the world in a variety of formats and by several print houses. As such, the advertising available for individual titles varies along with the advert dimensions and who to contact or send samples to. Please follow the instructions (right) to find the details you need.

General information

- 3 Technical specifications
- 3 Proofs
- 3 Production contacts
- 3 Further information

Display/classified advertising

- 4 Table of advertising available by journal
- 4 Display/classified advert dimensions

Inserts and outserts

- 5 Table of inserts and outserts available by journal
- 5 Insert samples
- 5 Insert/outsert specifications
- 7 Delivery instructions

Index of journals

- 8 Index of selected Springer Research journals

USING THIS GUIDE

- In the appropriate section, first find the journal of interest in the Table, then read across to discover the journal's page size, what is available for that title, and the Production contact.
- If you need to contact Production, the details are listed on page 3.
- The precise dimensions and other specifications for the various adverts are presented after the tables.
- Finally, take note of the technical specifications and other details on page 3.

Can't find the journal in the Table of interest?

Use the Index of Journals on page 8 to discover the journal group and subgroup, then find the corresponding row in the relevant Table.

Although we make every effort to ensure that the specifications in this document are accurate, they can be subject to change. Therefore, please check the specifications with us before sending any material for design or print.

General information

Technical specifications

Artwork should be supplied in PDF format. To ensure good reproduction of your artwork please supply a PDF to PDF/X-1a standard. If this is not possible, supply a standard CMYK, high resolution PDF (at least 300dpi), with all fonts and images embedded. Ensure that bleed is included and clearly shown with bleed marks.

- PDFs should not use any passwords or security options
- Artwork should be pre-flattened so there are no transparent objects in the supplied file
- Full page advertisements must have a bleed of 3.175 mm (0.125")
- Should not exceed ink density of 300%

Colour

- All files must use a CMYK or greyscale colour space
- No spot colours should be used
- No colour management, ICC profiles or Lab colour should be used

Images

- Images should be no less than 300dpi
- Images must be CMYK or greyscale

Proofs

For best colour reproduction you must supply an accurate colour proof. Send via conventional mail to your production contact. For display adverts, send to Richard Thomas; for inserts and outserts, send to Kay Lewis (see box). The proof must have been created from the same digital files as those supplied to us. For monochrome advertisements, a laser print is sufficient.

Further information

For further information, help and advice on any aspect of digital production contact:

Jason Rayment

Tel: +44 (0)20 7843 4807

jason.rayment@springernature.com

PRODUCTION CONTACTS

Production staff working on Springer Research journals:

At the London office:

Springer Nature Limited,
The Campus, 4 Crinan Street,
London, N1 9XW, UK.

For inserts/outserts, contact:

Kay Lewis

Tel: +44 (0)20 7843 4813

k.lewis@springernature.com

For display and classified advertising, contact:

Richard Thomas

Tel: +44 (0)20 7843 4824

richard.thomas@springernature.com

Journal page sizes: A = 210 mm × 297 mm (8.25" × 11.69"); B = 210 mm × 279 mm (8.25" × 11"); C = 155 mm × 235 mm (6.125" × 9.25").

Production contact: See page 3 for details.

Display/classified advert dimensions

All journals are printed in a portrait format at a trimmed page size as indicated in the Table above. Please check the Table to ensure that the advert size you require is available or contact your sales representative. See below for the advert trim sizes.

Please supply with an extra 3.175 mm (0.125") of bleed for all adverts that run to the edge of the page. Also ensure that all text and logos are placed no closer than 10 mm (0.4") from the trim. See page 3 for technical specifications.

Full page trim

Journal size Trim size (width × height)
 A = 210 mm × 297 mm (8.25" × 11.69")
 B = 210 mm × 279 mm (8.25" × 11")
 C = 155 mm × 235 mm (6.125" × 9.25")

Double page spread

Journal size Trim size (width × height)
 A = 420 mm × 297 mm (16.5" × 11.69")
 B = 420 mm × 279 mm (16.5" × 11")

Half vertical

Journal size Advert size (width × height)
 A = 82 mm × 254 mm (3.125" × 10")
 B = 82 mm × 254 mm (3.125" × 10")
 C = 60 mm × 200 mm (2.375" × 7.875")

Half horizontal

Journal size Advert size (width × height)
 A = 178 mm × 127 mm (7" × 5")
 B = 178 mm × 127 mm (7" × 5")
 C = 120 mm × 100 mm (4.75" × 4")

Quarter vertical

Journal size Advert size (width × height)
 A = 82 mm × 127 mm (3.125" × 5")
 B = 82 mm × 127 mm (3.125" × 5")

Inserts and outserts

Journal page sizes: A = 210 mm × 297 mm (8.25" × 11.69"); B = 210 mm × 279 mm (8.25" × 11"); C = 155 mm × 235 mm (6.125" × 9.25").

Production contact: See page 3 for details.

Insert samples

A sample of the insert needs to be approved by the Production department prior to insertion with the journal. Ideally this should be the actual piece, but if not available, a mock-up trimmed to the exact dimensions, using the same paper and folded or perforated as the final insert would be, should be provided. This needs to be with us at least two weeks prior to the issue date. A digital copy must also be sent in advance to check for content.

Please send 5 samples to the Production contact for the journal (see page 3), clearly identifying the front and back of the insert, or the page numbers where appropriate.

See below for insert specifications and also page 3 for other technical specifications. Once approved, inserts will need to be delivered to the relevant printing house; follow the delivery instructions from your Production contact.

If you have any queries regarding inserts please contact the production department.

Insert/outsert specifications

All journals are printed in a portrait format at a trimmed page size as indicated in the Table above. Please check the Table to ensure that the type of insert/outsert you require is available or contact Production. Listed on the following pages are the permitted dimensions and paper weights for the specific insert types.

It may be possible to accommodate types of inserts other than those shown in the Table above; please contact your sales representative to discuss any special requirements.

Although we make every effort to ensure that these specifications are accurate, they can be subject to change. Therefore, please check the specifications with us before sending any material for design or print.

Tip-on

- Supply to the trimmed size.
- Must be square or portrait.
- Front cover tip-ons will be positioned in the bottom left hand corner.
- A tip-on can have a specified position on the page; however there is a movement tolerance of up to 10 mm (0.4")

Journal	Width A	Height B	Paper weight
All	120–205 mm (4.75–8.125")	120–205 mm (4.75–8.125")	115–170 gsm (78–115 lbs)

Loose insert

- Must be supplied to the trimmed size.
- It is not possible to insert a concertina (z-fold) folded insert.
- Inserts must have a closed spine.
- All loose inserts of four pages or more are fed into the publication spine first.
- Maximum of 8 pages.
- Maximum overall weight for the insert is 90 grams (3 oz). For heavier items please contact your sales representative as this will incur extra distribution costs.

Journal	Width A	Height B	Paper weight
Size A	120–200 mm (4.75–7.875")	150–287 mm (6–11.375")	90–150 gsm (60–100 lbs)
Size B	120–200 mm (4.75–7.875")	150–269 mm (6–10.625")	130–170 gsm (90–115 lbs)
Size C	120–150 mm (4.75–6")	150–232 mm (6–9.125")	130–170 gsm (90–115 lbs)

Loose outsert

- Must be supplied to the trimmed size.
- It is not possible to insert a concertina (z-fold) folded insert.
- Outserts must have a closed spine.
- Must be no more than 32 pages.
- Maximum overall weight for the outsert is 90 grams (3 oz). For heavier items please contact your sales representative as this will incur extra distribution costs. We recommend for a single sheet, 90–150gsm; for 4–6 pages, 70–130gsm; and for 8–32 pages, 48–80gsm.

Journal	Width A	Height B	Paper weight
Size A	120–210 mm (4.75–8.25")	150–297 mm (6–11.69")	90–150 gsm (60–100 lbs)
Size B	120–210 mm (4.75–8.25")	150–279 mm (6–11")	130–170 gsm (90–115 lbs)
Size C	120–155 mm (4.75–6")	150–235 mm (6–9.25")	130–170 gsm (90–115 lbs)

Two/four-page bound insert

- Must be supplied with the correct trims added.
- All text should be at least 10 mm (0.4") from the edge of the final trim size.
- The height of the insert must exceed the width.
- Four-page inserts must be pre-folded on the spine edge. Include a 3 mm (0.125") spine trim on each page in the centrefold (6 mm total) — it will be trimmed on binding.

Journal	Width A	Height B	Head trim	Spine trim	Foot trim [†]	Fore-edge trim [‡]	Paper weight
Size A	120–210 mm (4.75–8.25")	150–297 mm (6–10.69")	3 mm (0.25")	3 mm (0.125")	3 mm (0.125")	3 mm (0.125")	90–150 gsm (60–100 lbs)
Size B	120–210 mm (4.75–8.25")	150–279 mm (6–11")	3 mm (0.125")	3 mm (0.125")	3 mm (0.125")	3 mm (0.125")	130–170 gsm (90–115 lbs)

[†]A foot trim is required only if the insert is at maximum height.

[‡]A fore-edge trim is required only if the insert is at maximum width.

Cover flap

- We print this with the journal cover. Supply as PDFs (single pages or spreads) adding 3.175 mm (0.125") bleed on each page and on all sides.
- Panel 1 has a variable height depending on the journal, please check with your Production contact.

Journal	Height A	Height B	Width C
Size A	Variable	297 mm (11.69")	105 mm (4.125")
Size B	Variable	279 mm (11")	105 mm (4.125")

Delivery instructions

Please note that failure to follow any of the following instructions could result in deliveries being refused.

All deliveries must be accompanied by a delivery note, attached to each box and on each face of a pallet. The delivery notes should state the following:

- Journal
- Issue date
- Advertiser/company
- Booking reference number
- Quantity in carton
- Total quantity delivered
- Carton number (e.g. 1 of 6)

If there is no information and if the driver of the delivery vehicle cannot obtain it, the inserts will not be accepted.

Attach the delivery note and a sample of the insert to each carton.

Up to 10 cartons can be accepted loose, any more than this should be supplied on a pallet. Pallets should be 800 × 1200 mm or 1000 × 1200 mm, sturdy, capable of stacking, allow four-way entry and well protected. Do not use metal straps.

- Pack inserts uniformly, facing upwards without turns.
- Do not mix inserts of a different type in a single delivery.
- A separate delivery note must be supplied for each insert.

Send inserts directly to the printer. The mailing address will be provided by your Production contact, Kay Lewis (see page 3).

Quantity delivered

A minimum of 3% wastage allowance should be included in the quantity delivered.

Any overs will be destroyed and recycled after the issue is printed. If you require overs to be kept for future issues this may be subject to handling and storage costs.

Important

All freight and import charges must be pre-paid by the supplier. Springer Nature is not responsible for delivery, arrival or for any shipments held in customs for any reason while in transit.

Index of selected Springer Research journals

Listed below are the journals covered by this specifications document. Find the journal of interest and note the Journal group and Subgroup to identify the correct rows to read from the Tables. This represents a small selection of Springer Research journals; if the journal you are interested in does not appear below, please contact Production for assistance.
